# AULIA AFRIZA

FRONTEND ENGINEER |  
AI ENGINEER

## ABOUT ME

Engineer with 9+ years of experience in frontend development combined with a strong academic background in Big Data (Master's degree). Specialized in building scalable web and mobile applications, and increasingly focused on developing AI-powered systems and data-driven solutions. Experienced in Python, data processing, and machine learning fundamentals, with hands-on experience in real-world data science projects including World Bank data tagging and hoax detection research. Passionate about bridging modern frontend systems with AI capabilities to create intelligent, user-centric products.

## EXPERIENCE

### Sr. Frontend Engineer

2022- until now

PT Elektronik Distribusi Otomatisasi Terkemuka (eDot)

- create apps mini program using TaroJs
- Developing website web admin and back office web for esuite by eDOT (Distribution Management System) (ReactJs, NextJS)

## Frontend Engineer

2017- 2020

PT Basajans Solusi Internasional

- Development mobile application for android and IOS using React Native and Expo.
- Review code based on guidelines and efficiency code
- managing application and submission to play store and app store for maintenance some feature, bug or improvement apps.
- Development mobile application for online DMC using IONIC
- Migration code from IONIC to React Native
- Create function logic for custom order one of feature in online DMC mobile and website

## PROJECT EXTERNAL

### PEFS Subnational Data Tagging - Data Sciences

World Bank Project

- 1. Development of Filtering Logic for MAFAP Keywords We developed a keyword-based tagging system to filter and classify records in the SIKD dataset files.
- 2. Sanity Check and Data Cleaning We have completed cleaning and validation of the full dataset. The next step is to assign each tagged record to the most appropriate MAFAP category code. This procedure will then be replicated for the remaining four districts.

### MGP website - HRD Website

PT Mitra Garda Perkasa

- Conduct a analysis of PT MGP to build an HR management application
- Create mockup for development website
- Developing website HRD Management

### Sandbox - WGSHub

- Create web mobile for order online F&B (<https://sandbox.stagingapps.net/>)
- Create web admin for maintenance order via mobile apps (<https://sandbox-merchant.sandbox.co.id/login>)
- Create web for kiosk or store F&B (<https://sandbox-kiosk.stagingapps.net/>)
- Create PWA for POS for sandbox (<https://pos.sandbox.co.id>)

### Sistem Informasi Dashboard - KUMKM

- Developing website for KUMKM for high level can be maintenance and analysis and viewing graph report for KUMKM
- Developing website static for KUMKM

### Sistem Informasi Eksekutif - ATR/BPN

- Developing website for ATR/BPN for high level can be maintenance and analysis and viewing graph report all section employee in one website

### Mobile Apps - PT Inalix

- Developing mobile apps for report and maintenance airport usage (terminal, airplane, schedule) for PT Inalix

### Mobile Apps - TNI AD

- Developing mobile apps for TNI AD, for high level can access every information from low level untill high level for each section employee
